PROFESSIONAL SUMMARY

Full-stack Python developer with 6 months of hands-on experience building Django-based web applications. Developed and integrated REST APIs (Representational State Transfer Application Programming Interfaces), designed SQL (Structured Query Language) database schemas, and implemented backend logic for real-world projects. Skilled in writing clean, maintainable code using MVC (Model-View-Controller) architecture principles. Quick learner with a track record of delivering working software from concept to deployment.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL (Structured Query Language)

Frameworks: Django, Django REST Framework (DRF)

Database: PostgreSQL, MySQL, SQLite

Tools: Git, GitHub, Visual Studio Code (VS Code), Postman

Concepts: REST API Development, MVC Architecture, CRUD (Create Read Update Delete) Operations, Database Design, User Authentication, Backend Development, Debugging, API Integration

WORK EXPERIENCE

Python Django Developer (Trainee) October 2025 - Present 2026

Clovion Tech Solutions Pvt. Ltd. | Azhagiyamandapam, Nagercoil, India

- Built REST APIs using Django REST Framework (DRF) to handle client-server data exchange, reducing manual data handling time for the team.
- Designed and implemented SQL database models with proper relationships, enabling structured storage for core application data.
- Developed CRUD operations for multiple modules, including user management and content administration panels.
- Fixed backend bugs identified during testing, improving application stability before product launch.
- Collaborated with a 3-member team using Git for version control, maintaining clean commit history across sprints.

PROJECTS

Employee Task Management System | github.com/kamilhisham3124

Tech Stack: Python, Django, Django REST Framework, PostgreSQL, Git

- Built a full-stack web application to manage employee tasks and track project progress across departments.
- Designed a normalized SQL database schema with role-based access, supporting managers and employees with separate views.
- Developed 12 REST API endpoints for task creation, assignment, status updates, and reporting.
- Implemented user authentication using Django's built-in authentication system with login, logout, and session management.
- Deployed the application on a local server and validated all API endpoints using Postman.

Gift Delivery Ecommerce System (Academic Project) | github.com/kamilhisham3124

Tech Stack: Python, Django, SQLite, HTML, CSS, Git

- Developed a web-based platform allowing customers to order gifts and vendors to manage deliveries for multiple products.
- Designed an SQLite database schema to store product records, customer data, and order details with relational integrity.
- Built CRUD views in Django for admin, vendor, and customer user roles with separate dashboards.
- Applied MVC (Model-View-Controller) architecture to separate business logic, database access, and UI (User Interface) templates cleanly.

EDUCATION

Bachelor of Engineering in Computer Science Graduated: May 2025

PET Engineering College, Vallioor, Tirunelveli, India | CGPA: 8.0/10

Python Programming Internship Training June 2023 - August 2023

Pantech eLearning | Certificate-based training in Python fundamentals and object-oriented programming (OOP)
